■ Other Helpful Tips

- Spend a few hours surfing the Internet for web sites related to your business.
- Bookmark web sites that you like.
- Take notes about the web sites that you like and what you like about them.
- Think of at least 5 different domain names for your web site. Example "mybusiness.com"
- Think about what you want to accomplish with your web site and write it down in detail.
- Plan on putting your domain on every piece of advertising that your company has; business cards, letterhead, banners, yellow pages, etc.
- Explain in detail the nature of your business.
- Make sure that you have enough typed text for the web site. Have your keywords and key phrases repeated in your text.
- Have a color scheme planned before starting the construction of the web site.
